SUMMARY

Fullstack Software Developer with 3 years of experience in web interfaces design and backend development, expert in React and Python. My key achievements include increasing user engagement by 30% for a platform serving over 5,000 users and reducing manual order processing time by 40% through ERP API integration. I bring my web interfaces design and backend development skills to support your mission of building trustworthy, innovative, and scalable solutions.

KEY ACHIEVEMENTS

Backend Solutions Development

Developed backend solutions, increasing sales by 30% on e-commerce platform serving over 5,000 users.

AI Technologies Integration

Integrated AI technologies, enhancing payment systems, achieving a 25% monthly transaction increase without errors.

User Engagement Optimization

Optimized user engagement, boosting platform activity by 30% through innovative backend solution strategies.

ESTHER WANZA MUTUA

FULLSTACK SOFTWARE DEVELOPER

EXPERIENCE

Valtra ventures

Remote

Software Engineer

03/2024 - Present

- Designed and developed an e-commerce platform serving 5K+ monthly active users, implementing UX enhancements and performance optimizations that increased sales by 30% and improved conversion rates.
- Collaborated with a cross-functional team of 10 to integrate secure, PCI DSS-compliant payment systems, increasing monthly transactions by 25% while achieving zero payment failures or fraud incidents over 12 months.
- Innovated automated order fulfillment and analytics by building custom REST APIs that reduced manual processing time by 40% and improved operational accuracy.
- Reviewed and optimized system performance through image compression, lazy loading, and server-side rendering, reducing page load times by 25% and boosting SEO rankings.
- Managed deployments and supported operational excellence by ensuring 100% uptime during peak traffic events through proactive monitoring and incident resolution.

Kenya School of Government

Nairobi, Kenya

Front End Developer

12/2023 - 02/2024

- Improved platform stability by 30% over 12 months, reducing downtime from 10 hours per month to under 7 hours through front-end optimizations and over 25 updates using JavaScript (ES6+), HTML5, and CSS3, collaborating with back-end and IT teams to ensure uninterrupted e-learning delivery.
- Reduced page load time by 25% via asset minification, image compression, and lazy loading, boosting user retention and engagement during peak traffic periods.
- Resolved cross-browser and device compatibility issues, achieving WCAG 2.1 accessibility compliance to improve usability for staff and learners.
- Delivered 10 targeted training sessions to over 70 staff on new platform features, increasing adoption and reducing support requests by 20%.

KCA University

Nairobi, Kenya

Web Developer

12/2022 - 04/2023

- Improved website uptime by 10% (from 89% to 99%) by identifying and resolving 20 navigations, accessibility (WCAG 2.1), and page-load issues using JavaScript (ES6+), HTML5, and CSS3, ensuring uninterrupted access to course materials for 100+ students and staff.
- Delivered 3 key academic web applications by integrating data from 4 back-end services and 2 MySQL databases via RESTful APIs, streamlining workflows for grading, timetable scheduling, and library resource management.
- Maintained 99.9% system availability across 5 web platforms by assisting in Linux server configuration, conducting performance monitoring, and applying security patches, preventing downtime during peak enrollment periods.
