EXPERIENCE

Software Engineer

- Pearce Media 03/2024 - Present Remote
- Designed and developed an e-commerce platform serving 5K+ monthly active users, implementing UX enhancements and performance optimizations that increased sales by 30% and enhanced conversion rates.
 - Collaborated with a cross-functional team of 10 to integrate secure, PCI DSS-compliant payment systems, increasing monthly transactions by 25% while achieving zero payment failures or fraud incidents over 12 months.
 - Innovated automated order fulfillment and analytics by building custom REST APIs that reduced manual processing time by 40% and improved operational accuracy.
 - Reviewed and optimized system performance through image compression, lazy loading, and server-side rendering, reducing page load times by 25% and boosting SEO rankings.
 - Managed deployments and supported operational excellence by ensuring 100% uptime during peak traffic events through proactive monitoring and incident resolution.

Front End Developer

- Kenya School of Government 12/2023 - 02/2024 Nairobi, Kenya
- Improved platform stability by 30% through front-end optimizations and more than 25 production updates, helping reduce downtime and support uninterrupted e-learning delivery.
 - Reduced page load time by 25% using asset minification, image compression, and lazy loading, improving user retention and engagement during peak traffic periods.
 - Resolved cross-browser and device compatibility issues while meeting WCAG 2.1 accessibility standards, improving usability for staff and learners.
 - Delivered 10 training sessions for over 70 staff on new platform features, increasing adoption and reducing support requests by 20%.

Web Developer

- KCA University 12/2022 - 04/2023 Nairobi, Kenya
- Improved website uptime from 89% to 99% by resolving navigation, accessibility, and page-load issues, ensuring reliable access for 100+ students and staff.
 - Delivered 3 academic web applications by integrating 4 back-end services and 2 MySQL databases through REST APIs, streamlining grading, scheduling, and library workflows.
 - Maintained 99.9% system availability across 5 web platforms by supporting Linux server configuration, performance monitoring, and security patching during peak enrollment periods.

EDUCATION

Certificate

Moringa School 2025 Nairobi, Kenya

Bachelor of Science in Information Technology

KCA University 2024 Nairobi, Kenya

Diploma in Information Technology

KCA University 2021 Nairobi, Kenya

SUMMARY

Analytical software developer with 4+ years of experience delivering digital products, improving operational efficiency, and collaborating across teams in fast-paced environments. Built secure, scalable web solutions, streamlined workflows through API integrations, and supported high-availability platforms serving thousands of users. Brings a strong foundation in problem-solving, adaptability, and execution, with a track record of improving performance, supporting business goals, and learning quickly in dynamic settings.

KEY ACHIEVEMENTS

-  Business Growth Impact
Supported transaction growth by 25% through secure payment integration improvements for a platform serving 5K+ users.
-  Process Efficiency Improvement
Reduced manual processing time by 40% by developing API-driven workflow improvements for order fulfillment.
-  Operational Reliability
Maintained 100% uptime during peak events through proactive monitoring and rapid issue resolution.

SKILLS

Agile	Cross-functional collaboration			
Problem-solving		Adaptability		
Analytical thinking		Communication		
Project coordination		Process improvement		
Stakeholder support		React	JavaScript	
Python	API integration		PostgreSQL	
MySQL	Git	CI/CD	Documentation	
CSS	Angular	Vue.js	Node.js	Java
PostgreSQL		MongoDB	AWS	Azure
GCP	Creativity	Teamwork		
Problem-Solving		HTML	Laravel	
Critical Thinking		Communication		
Cybersecurity		Adaptability	AML	
API Gateway		Integrity		
Attention to detail
